Subject: Great Lakes Maritime Security course

Larry,

I promised to write w/re to our security training at Great Lakes: Upon entering school our first year cadets are housed aboard the State of Michigan. During this two week period we review the security plan for the vessel and then drill per our security plan daily with the cadets.

Emphasized are: organized search of the vessel, boarding procedures w/re to identification, MERSEC levels and response to differing levels.

As you can see our approach thus far has been hand on.

I hope this will take care of what I owe you.
