### **Industrial Boiler Instrumentation and Control System Field Service-**

Industrial boiler control system integrator and service provider seeks experienced field service engineer for instrumentation calibration, control system troubleshooting and boiler/burner adjustments in the greater metropolitan NYC region. Regional travel to some of our other customers in northern NJ, CT, MA and RI may be occasionally required. Typical customers include hospitals, universities, district steam plants, prisons and airports with high pressure steam boilers or high temperature hot water generators.

Strong technical skills, independent work ethic and a demonstrated ability to meet goals and objectives are required to be a successful contributor.

Technical skills include prior field service experience, strong electrical background and knowledge of boilers, burners and controls. Applicant must be able to read electrical wiring diagrams and ladder logic diagrams. Familiarity with PLC's, loop controllers, Fireye flame safety systems, HART handheld communicators and multimeters is also needed. Programming experience is not required but is highly desirable.

We are responsible for the efficient and reliable operation of the boiler controls and related instrumentation at numerous central heating plants in the region. Our service engineers work independently on many types and brands of controls and instrumentation at these facilities. We are looking for a self starter with a well rounded background to meet the challenges associated with the variety of customers and equipment.

Typical duties include:

- Calibration of pressure, temperature and flow instrumentation.
- Combustion testing and boiler combustion tune ups.
- Safety limit testing and calibration.
- Troubleshooting of boiler control system problems.
- Repair/replacement of instrumentation to correct system problems.
- Control system commissioning and startup for new installations and retrofits.
- Operator training for newly commissioned systems

We offer a competitive salary and benefit package including vehicle, medical, disability, pension and expense account. We recognize our team member's achievements and have the small company flexibility to reward them accordingly.

Send resume to ABLE Company 70A Raton Drive, Milford, CT 06461. FAX (203) 876-0150 or E-Mail to: [jobs@ablecompany.com](mailto:jobs@ablecompany.com)

### **About ABLE Company**

The ABLE Company (Associated Boiler Line Equipment Co., Inc.) is a full service power plant equipment, instrumentation and controls specialist serving the industrial, institutional and utility sectors. The company was founded in 1972 as a power plant combustion control service organization and has grown to become the regional leader for sales, installation and startup of industrial boiler control systems, instrumentation and capital equipment for the region's steam plants. We represent several of the leading capital equipment OEMs and utilize instrumentation and controls from all of the major brands. Our customers, located primarily in NY, NJ and New England, include hospitals, universities, institutions, utilities and major manufacturers with central high pressure steam or high temperature hot water generating facilities that are used to support their manufacturing processes, heating or power generation requirements.
