

APPLICATION ENGINEER - NEW BEDFORD, MA

Our client, one of the leading distributors of customized propulsion packages and generator sets for the marine, commercial and residential industries in the New England area, is looking for an Application Engineer to help oversee the customization and installation of their product line.

They are looking for someone with the following background:

- Strong knowledge of generators and engines, preferably in the marine segment
- Possible sailing experience as a Licensed Marine Engineer on small-to-medium sized vessels
- Ability to work closely with the sales staff to ensure projects mirror customer requirements and budgetary constraints
- Good personality and results-driven individual that is eager to ensure the product delivered exceeds company and client expectations
- Experience with Project Management and/or Application Engineering
- Willing to travel up to 40% at times to trade shows, client visits, and project sites.
- Eager to meet new people in the industry and gain new clients by assisting sales and business development team

The successful candidate will be offered a solid hourly rate, strong overtime potential, full medical and retirement benefits, paid vacation and automobile/fuel reimbursement.
