HOW TO ACCESS THE SUNY MARITIME WIRELESS NETWORK

STEP 1: Connect to the network named “Student_Provisioning”

STEP 2: Go to https://mydevices.sunymaritime.edu/ and select “continue to this website” (or “add site to exception list”, or your browser equivalent)

STEP 3: At the sign on page, use your Maritime credentials (username and password) to log in.

STEP 4: At the devices portal, click on the “Add” button.

STEP 5: At the add device page, type in the following and click on the “Submit” button when finished:
[if !supportLists]your device name (how you refer to it; for example, the model name/number, or a nickname)
[endif]
[if !supportLists]your device ID (the MAC address or Wi-Fi address of your wireless adapter)
[endif]
[if !supportLists]your device description (what the device actually is, such as a laptop, tablet, smartphone, stationary or portable game console)

STEP 6: When finished adding your devices, click on your name on the upper-right corner and log off.

STEP 7: Connect to the network that is closest to you. When you see a pop up window asking for network authentication, enter your Maritime credentials and click OK, and click “Connect” if necessary.

STEP 8: Open a web browser and navigate to any page. A “Device Security Check” will occur and ask to download a Cisco NAC Web Agent onto your device. Once this is done, you may need to unjoin and join the network again to ensure full Internet connectivity.

On the main page of https://mydevices.sunymaritime.edu (after you have
added your devices), you can select on one of them, which will bring you to a separate page where you will be given an option to edit your device, remove the device altogether, or even report your device if it is either lost or stolen. You can access the My Devices Portal from any network (and not only from Student_Provisioning).

If you wish to connect your game console, add it to your portal and then connect it to the network that is closest to you, but choose the equivalent “Gaming” network to add it under.

If you still have questions, or need assistance to access the network, please contact the help desk at (718) 409-6917.

Regards,

IT Department
