Maritime Broadband – Job Description

Title: Marine VSAT Communications Technician

Reports to: VP Engineering

Summary Job Description:

Marine VSAT Communications Technician to install, commission and service VSAT systems on merchant ships internationally, offshore and at US ports. Ability to travel internationally on short notice required.

Duties and Responsibilities:

- Will be required to install, maintain and repair the electronics systems and all equipment of the VSAT system on merchant vessels.
- Responsible to repair or replace wiring equipment or fixtures using hand or power tools.
- Examine system of circuits in electrical wiring, equipment or fixtures using testing devices such as ohmmeters, voltmeters, oscilloscopes, etc., to confirm compatibility and safety of system.
- Connect, monitor, control and configure networking equipment.
- Ability to diagnose faulty systems, apparatus or parts using equipment and hand tools to find the source of any breakdown and correct the problem at hand.
- Inspect electrical systems, equipment or parts to spot defects, any necessity for adjustment or repair, or any hazards. Will inspect for and confirm compliance with codes and enforce strict adherence to safety regulations.
- Ability to work from shipboard ladders and scaffolds at heights above deck to install, maintain or repair electrical wiring, equipment or fixtures.
- Prepare sketches and follow blueprints to inspect the placement of wiring and equipment and to confirm correspondence to assembling and safety codes.
- Work on the installation and connection of RF, DC power and CAT5 cables to equipment, such as motors and gears.
- Troubleshoot issues for clients, give recommendations for resolution; calculate and deliver estimates to clients for repair, replacement and installation solutions and repair/replacement recommendations.

Qualifications:

- A minimum of five years recent expertise as a skilled Marine worker.
- Willingness and ability to travel anywhere in the world on short notice.
- Ability to think on your feet to make quick evaluations and decisions.
- Strong client service skills are critical.
- Able to physically handle climbing, lifting, working safely at heights and in possible adverse weather conditions.
