- ✓ Accommodations for 2

About Menger Catboats

The catboat is a wide-bodied, one-masted sailboat originally designed in the 1850's as a working vessel. One person could sail it alone in all kinds of weather, and it was stable enough for clamming or lobstering. It is particularly well-suited to the sometimes shallow inland waters of the South Shore (of Long Island). Today, the style is popular with recreational sailors.
