About this job

Job description

This is an exciting opportunity to join our existing chemical operations team in Houston as we prepare for the arrival of our fuel-efficient new build vessels with exclusively modern eco-designs. As a vessel operator, you will be responsible for co-ordinating the day to day operational activities of voyage and time chartered chemical tankers.

Responsibilities will include:

- Ensuring compliance with agreed charterparty terms
- Overseeing agency appointments
- Communicating with charterers, brokers, agents and vessels regarding voyage orders and vessel itineraries
- Handling letters of indemnities
- Monitoring vessel movement and voyage performances
- Reviewing vessel stowage and tank cleaning plans
- Overseeing the fixing of freight charges and obtaining cargo space
- Liaising with owners regarding oil major approvals

This is a great time to join our growing Company as the delivery of our newbuild programme picks up the pace in 2016 and 2017. For more information on our newbuild programme and on our fleet, please visit our website: <http://www.navig8chemicals.com/>

Desired Skills and Experience

We are looking for someone with several years' experience as a shore based vessel operator with experience and expertise in chemicals. You must have sound commercial awareness and be self-motivated with good oral and written communication skills.

If you feel this role matches your profile, please provide us with a covering letter and CV outlining your skills and experience.

About this company

Following company

Operating one of the largest and most diverse fleets on the water, Navig8 Chemicals is consolidating the industrial chemicals shipping sector for the benefit of owners and charterers and our vessel pools span the market.

Combining a market-leading, commercially-minded chartering team and a relentless focus on transportation safety best practice, we have built a high-quality and extensive cargo base that combines relationship-driven volumes and contracted (CoA) business. We work closely with over 250 charterers globally, encompassing the leading market participants. Our track record of reliability and flexibility has enabled us to develop a CoA portfolio, with leading charterers, that typically provides 20-40% forward cargo coverage.

In addition to its pool management activities, Navig8 Chemicals is an active charterer. As an experienced shipowner and operator, we offer term employment options to owners, and chartered vessels are placed into the relevant Navig8 Chemicals pools. Typically, we have owned or controlled tonnage in most, if not all, pools and this is welcomed by pool members as a reinforcement of our commitment to optimal earnings performance.

As part of the Navig8 Group, Navig8 Chemicals accesses huge information flow generated by the world's largest independently-managed pool fleet. By analysing and extracting value from this information, our team is able to devise optimised solutions to meet customers' needs. Together with cost and operational efficiencies gained from our fleet size, we consistently deliver revenue outperformance for our new and existing pool members.
